PROJECTS

FARM TO TABLE
Github Link: https://github.com/reanderson89/farm_to_table
- Application that helps bring farm fresh food to local communities. Connecting users with farms in their area and giving them a fun and easy online shopping experience.
- Lead the front end operations and logical processes. Engineered creative interactions for enhanced user experience.
- Technology: MongoDB, Express, React, Node, Mongoose, Bulma

BARKMATCH
Github Link: https://github.com/reanderson89/BarkMatch-project2
- Founded from the need to get dog shelters help through creating a way for everyday people to register and volunteer to walk a dog. Users can search for the dog they would like to walk and then set a date and time with the shelter.
- Partnered with teammates to work though front and back end. Designed and implemented dynamic features to make experience easier while facilitating the connections from the database into the front end.
- Technology: Node, Express, Handlebars, Nodemailer, Passport, Bulma,
